

Datasheet

RTE - Stainless Steel Exit Buttons

Product Description

The RTE-S series of exit switches offers a flexible and reliable solution for exit triggering in a wide range of applications, from medium to high traffic environments.

Suitable for both internal and external use, the range includes square and narrow architrave models in flush or surface mount formats. Manufactured from high-grade stainless steel, these robust exit devices conform to standard UK back-box formats for quick and easy installation.

Available with laser etched or green "PRESS TO EXIT" text, the series also offers a choice of standard stainless steel buttons or high-impact green dome actuators, ideal for environments where a larger and more visible target button is required.

Key Features

- Square or architrave trigger devices
- Standard button or high impact dome push button
- Surface or flush mount
- UK back-box format for easy installation
- Suited for internal or external use
- High quality stainless steel

Certification

Certification

DEEE

Certification

IP65 or IP67

-20°C to 55°C

Product Specifications

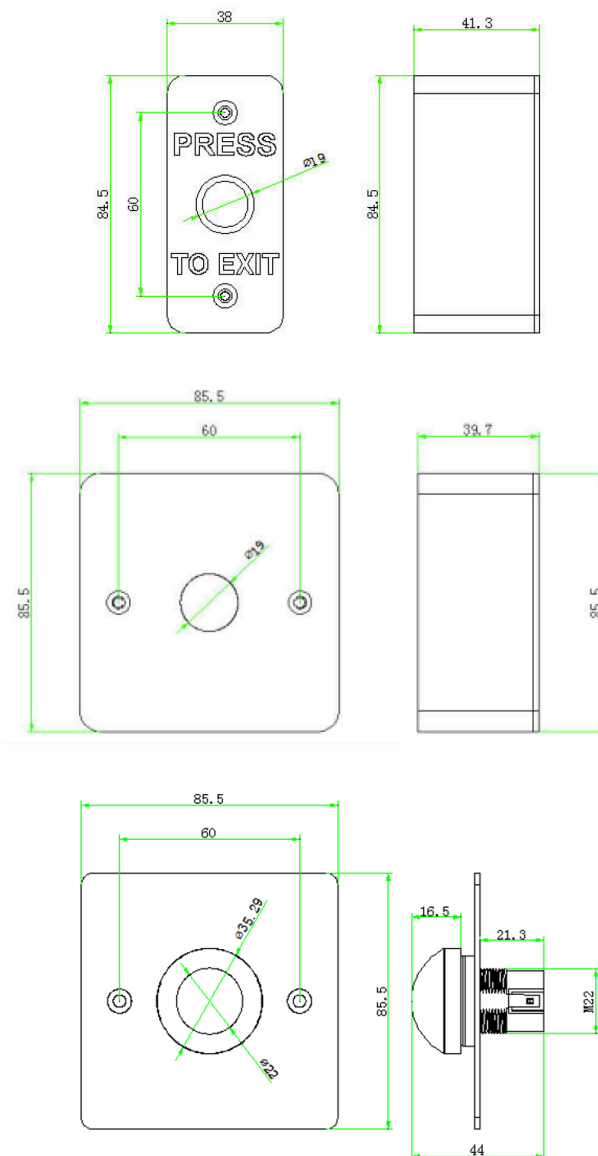

Material: 304 stainless steel faceplate
Mounting: Flush or surface
Button Type: Push button or green dome
Engraving: Laser-etched engraving
 Paint-filled for RTE-SSD and RTE-SFD

Cycles tested: 500,000 to 1,000,000 cycles

Weight: RTE-AS: 0,180 kg
 SF: 0,190 kg
 SS: 0,290 kg
 SFD: 0,280 kg
 SSD: 0,330 kg

Dimensions:

- RTE-AS: 84.5 x 38 x 41.3 mm
- RTE-SS: 85.5 x 85.5 x 39.7 mm
- RTE-SF: 85.5 x 85.5 x 44 mm
- RTE-SSD: 85.5 x 85.5 x 29 mm
- RTE-SFD: 85.5 x 85.5 x 44 mm

Electrical Specifications

Output contact: Single pole, NO/COM or SPDT, NC/COM/NO
Contact rating: 2A @ 24V
